Afb. 72

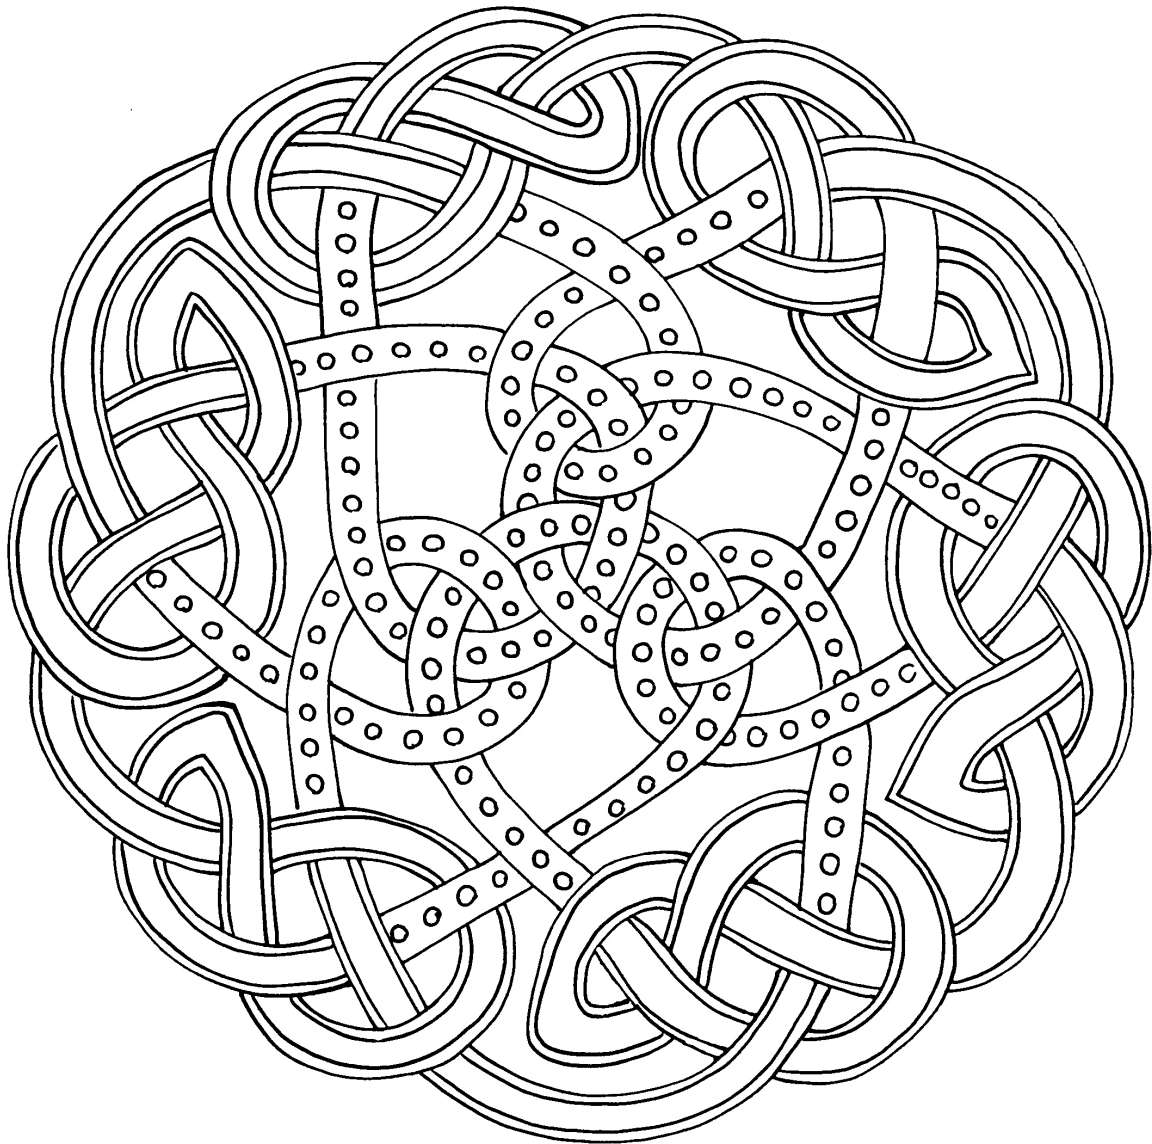

Tot de mooiste voorbeelden van zinvolle ornamentkunst, tegelijk hoogste symboliek, behoren de beroemde 'beeldstenen' op het Zweedse eiland Gotland, stamland der Oude Goten, die in de Europese geschiedenis zo'n grote betekenis hebben gehad.

Deze stenen werden al geplaatst vanaf het herstel, na de verwoesting rond 500 n. Chr. Het waren geen grafmonumenten, zoals in later tijden, doch dienden een eredienst, waarin de zon een grote rol speelde en werden geplaatst op hoge, bijzondere plaatsen. De hierbij afgebeelde hoofdvoorstelling van de steen van Vallstena, toont een wervelend zonnensymbool, omringd door 5 kleinere zonnetekens, eronder strijdende mannen, erboven twee dieren. De stenen zelf hebben de vorm van een bijl en de voorstellingen zijn in een prachtig, strak laagrelief uitgevoerd.

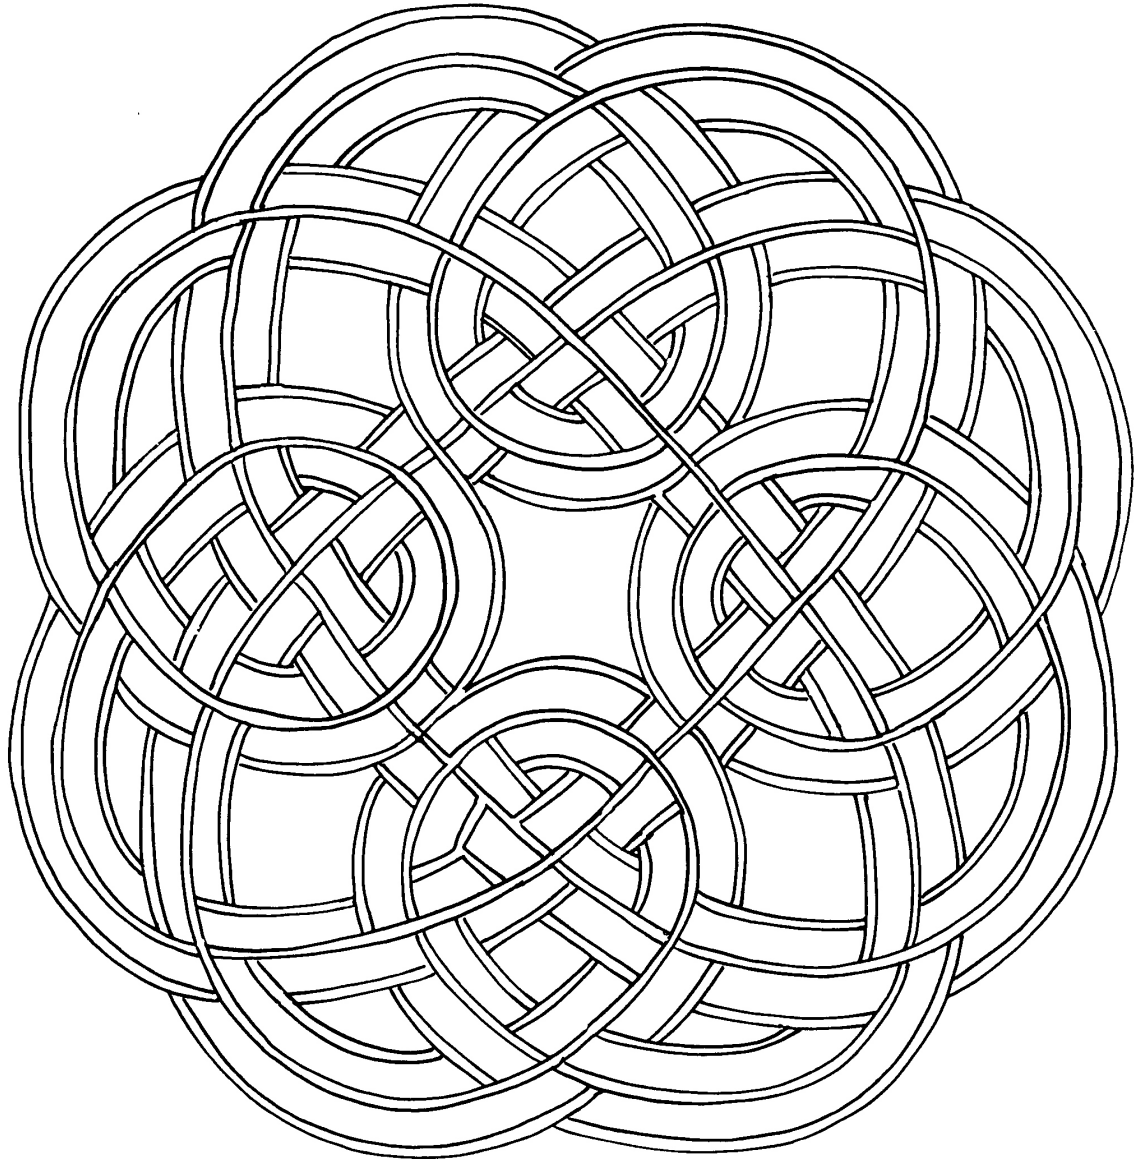

Deze afbeelding werd overgenomen uit het boek: 'Gotland' van Uwe Lemke, uitgave Verlag 'Urachhaus', Stuttgart, 1970. Een zeer bijzonder boek over een zéér bijzonder eiland. De tekening is van Ulli Winkler, Stuttgart
